[redacted] An air force unit, a signal unit and a small SP artillery unit were in a camp near the airfield. CO of the SP artillery unit was a Maj Sandor (or Andras) Mogyorossy (former AA artilleryman and temporarily teacher at the Kossuth Academy). (2)

The 8th Border Guard Bn was reported in Zalaegerszeg up to November 1949. It is therefore assumed that it may be the mentioned Zalaegerszeg border guard battalion.

[redacted] The Zalaegerszeg component units of the battalion were probably only headquarters and the training company, increased in strength by recruits inducted in November 1949. The forthcoming transfer of soldiers from Zalaegerszeg to the border seems probable because recruits having completed their basic training are distributed to companies on border guard duty.

(3) Artillery and AAA units quartered in the new barracks were reported [redacted] in October 1949.

(4)

No Hungarian troops have been in Tapolca so far.

(5) The Nagykanizsa border guard battalion is probably the 9th Border Guard Bn which was last identified there in October 1949.

(6) The two batteries were reported [redacted] in [redacted] October 1949.

25X1

(7) There are no leads for the identification of the infantry unit. It may be a border guard unit which was transferred from another border region to the Hungarian-Yugoslav border.
